<b>Office Action Summary</b>	<b>Application No.</b> 10/796,759	<b>Applicant(s)</b> TUFTS ET AL.	
	<b>Examiner</b> David J. Walczak	<b>Art Unit</b> 3751	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election***

Applicant's election without traverse of Group I (claims 1-10) in the reply filed on 10/14/04 is acknowledged.

### ***Abstract***

The abstract of the disclosure is objected to because phrases which can be implied, such as "the present invention relates" (see lines 1 and 2) should not be present therein. Correction is required. See MPEP § 608.01(b).

### ***Specification***

The disclosure is objected to because of the following informalities: Paragraph 0002 should be updated to indicate that application 10/388,826 has matured into U.S. Patent No. 6,729,786. Further, reference character 34 (Figure 1 is not present in the specification. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. An antecedent basis for "said open end of said body" should be defined.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 8-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Barosso et al. (hereinafter Barosso). In regard to claim 1, Barosso discloses a method of making a liquid applicator wherein the applicator is "shaped for receiving a frangible ampoule" comprised of providing a substantially hollow body 4 (see Figure 4) and positioning a porous element 20a comprising colorant (see column 7, lines 45-57) such that when liquid flows through the element, colorant is transferred to the fluid. It is noted that the statements of intended use of the device, i.e., "adapted to receive at least one ampoule" do not lend any patentable structure to the claims. Further, the hollow body 4 in the Barosso device is capable of receiving a frangible ampoule. In regard to claims 2 and 3, the porous element is considered to be both a "porous pad" and a "porous plug". In regard to claim 8, a porous pad 3 closes an open end of the body. In regard to claims 9 and 10, the porous element 20a is first saturated with colorant and then allowed to dry (column 6, lines 58-62).

***Allowable Subject Matter***

Art Unit: 3751

Claims 4-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Conclusion***
